

n a t u r a l v e n t i l a t i o n LUMIWALL PANEL

► LUMIWALL CLEAR PANEL

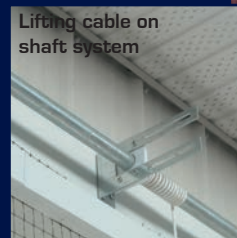

FINALLY A PANEL COMBINING TRANSPARENCY AND INSULATION !

- ✓ Made of light and rigid polycarbonate
- ✓ Composed of 5 walls with 4 air spaces providing insulation (R 6.7) and rigidity
- ✓ Silent, very light and without maintenance system
- ✓ Frame and hardwares made of aluminum
- ✓ Double U.V. treated flexible weatherstrip included
- ✓ Rigid outside posts made of aluminum
- ✓ 10 year warranty against U.V.
- ✓ Can be operated with our transmission shaft system or by an high performance actuator

RELIABLE AND WITHOUT ADJUSTMENT SYSTEMS

The transmission shaft system enables you to have a more reliable system by eliminating pulleys adjustments that are necessary with traditional systems. A main steel rod is installed at the top of the opening all along the building and serves as a transmission shaft for the panels. Once the rod is put into motion it enables the cables that are holding the panels to roll up around it, also making the panels go up or down automatically. The SECCO actuators are heavy duty and reliable. They are always supply with potentiometer for more precision. There is also possibility to replace the corner pulley with an high performance chain system to eliminate the corner tension on the main steel cable.

► AUTOMATISATION BY TRANSMISSION SHAFT SYSTEM OR ACTUATOR
